Healthmark Industries Launches Endo Parts Bag

Written by Rob Kurtz | January 25, 2012

Social Sharing

Healthmark Industries Co., which develops products for the sterilization, decontamination, storage and security of surgical instruments and other medical devices and accessories, has announced the launch of the Endo Parts Bag, according to a news release from [Healthmark Industries](#).

This product is intended to help organizations keep all of the valves for their endoscopes together, as is directed by manufacturers.

By detaching the valves before placing endoscopes in storage, this will help keep the scopes from retaining water and therefore prevent contamination, according to the release.
