Identification Made Easy

Fraser, MI, June 18, 2015 - Healthmark has announced that they are now offering the Transportation Identification Label. This first of its kind label is designed for compliance with OSHA standard CFR 1910.1030.

The Transportation Identification Label features one perforated tab, a green top tab with "CLEAN" in black text, a fluorescent orange/red bottom tab with "DIRTY" in black text, and the removable OSHA approved "Biohazard Label" adhesive backing. The Transportation Identification Tag is produced precisely for transporting materials considered a biohazard, while acting as an essential communication tool in the process. By labeling a cart or container "biohazard" upon its return to the sterile processing department, the Transportation Identification Label assists in supplying information to the OR/Procedure Room. Furthermore it has a check list for the surgical/procedure room/sterile processing team to ensure adequate delivery of the case cart or container in question. Identification is made easy with this new innovative label!
