New Clean and Dirty Locks for Extra Round Soaker Security

Fraser, MI, June 13th 2016 - Healthmark has announced the addition of The Endo Bin and Trolley Set. It's comprised of five (5) lockable Round Soakers trays (20" diameter) to safely hold flexible scopes without over bending. These trays easily slide onto a specially designed stainless-steel Trolley. The lockable trays allow you to create a controlled delivery and retrieval system for endoscopes with tamper evident seals. For your convenience we have included a pre-packaged sample pack of 2 "Clean" seals (green) and 2 "Dirty" seals (red-biohazard) for each lockable Round Soaker tray.

The green locks create a clear message to the clinical staff that the internal endoscope has been processed and is ready for use. The red-biohazard seal in contrast clearly indicates the scope has been used and is contaminated.
