March 24, 2020

To Whom It May Concern,

Healthmark Industries is a primary provider of medical and surgical products, including infection control products for healthcare facilities. As the demand for healthcare services accelerates due to the ongoing COVID-19 (Coronavirus), Healthmark customers are relying on our ability to supply them with important infection control products, including PPE and healthcare cleaning products.

In accordance with Governor Gretchen Whitmer's Executive Order 2020-21 and as designated by U.S. Department of Homeland Security Cyber and Infrastructure Security Agency (CISA), Healthmark Industries and our employees are designated as an essential critical infrastructure workforce.

Healthmark Industries has implemented numerous policies in line with our Business Continuity Plan to protect our Healthmark employees, our vendors, our customers and our community. Employees that are able to carry out their functions remotely, are working remotely. Additionally, we have taken measures to suspend company visitors and increased the frequency and efficacy of cleaning and disinfection of our facilities.

To continue to serve the needs of healthcare providers, employees whose functions require physical presence at our facilities, either full or part-time, will commute to and from those facilities. They are essential to our critical business operations. We continue to implement the most up-to-date CDC guidance to alleviate help safeguard the health of those employees. As part of achieving this, it is essential that these essential Healthmark workers are able to report to work and travel as necessary.

Healthmark Industries acknowledges the obligation to appropriately provide for hospitals and healthcare facilities during these critical months ahead. Thank you for your continued support.

Sincerely,
Mark Basile
