# Tray Identification Tags

## For barcode labels & handwritten notes

These resin-bonded tags are designed for tray identification and may be used with barcode labels or hand written notes. They can remain with the sterilization basket throughout the collection, decontamination and sterilization process.
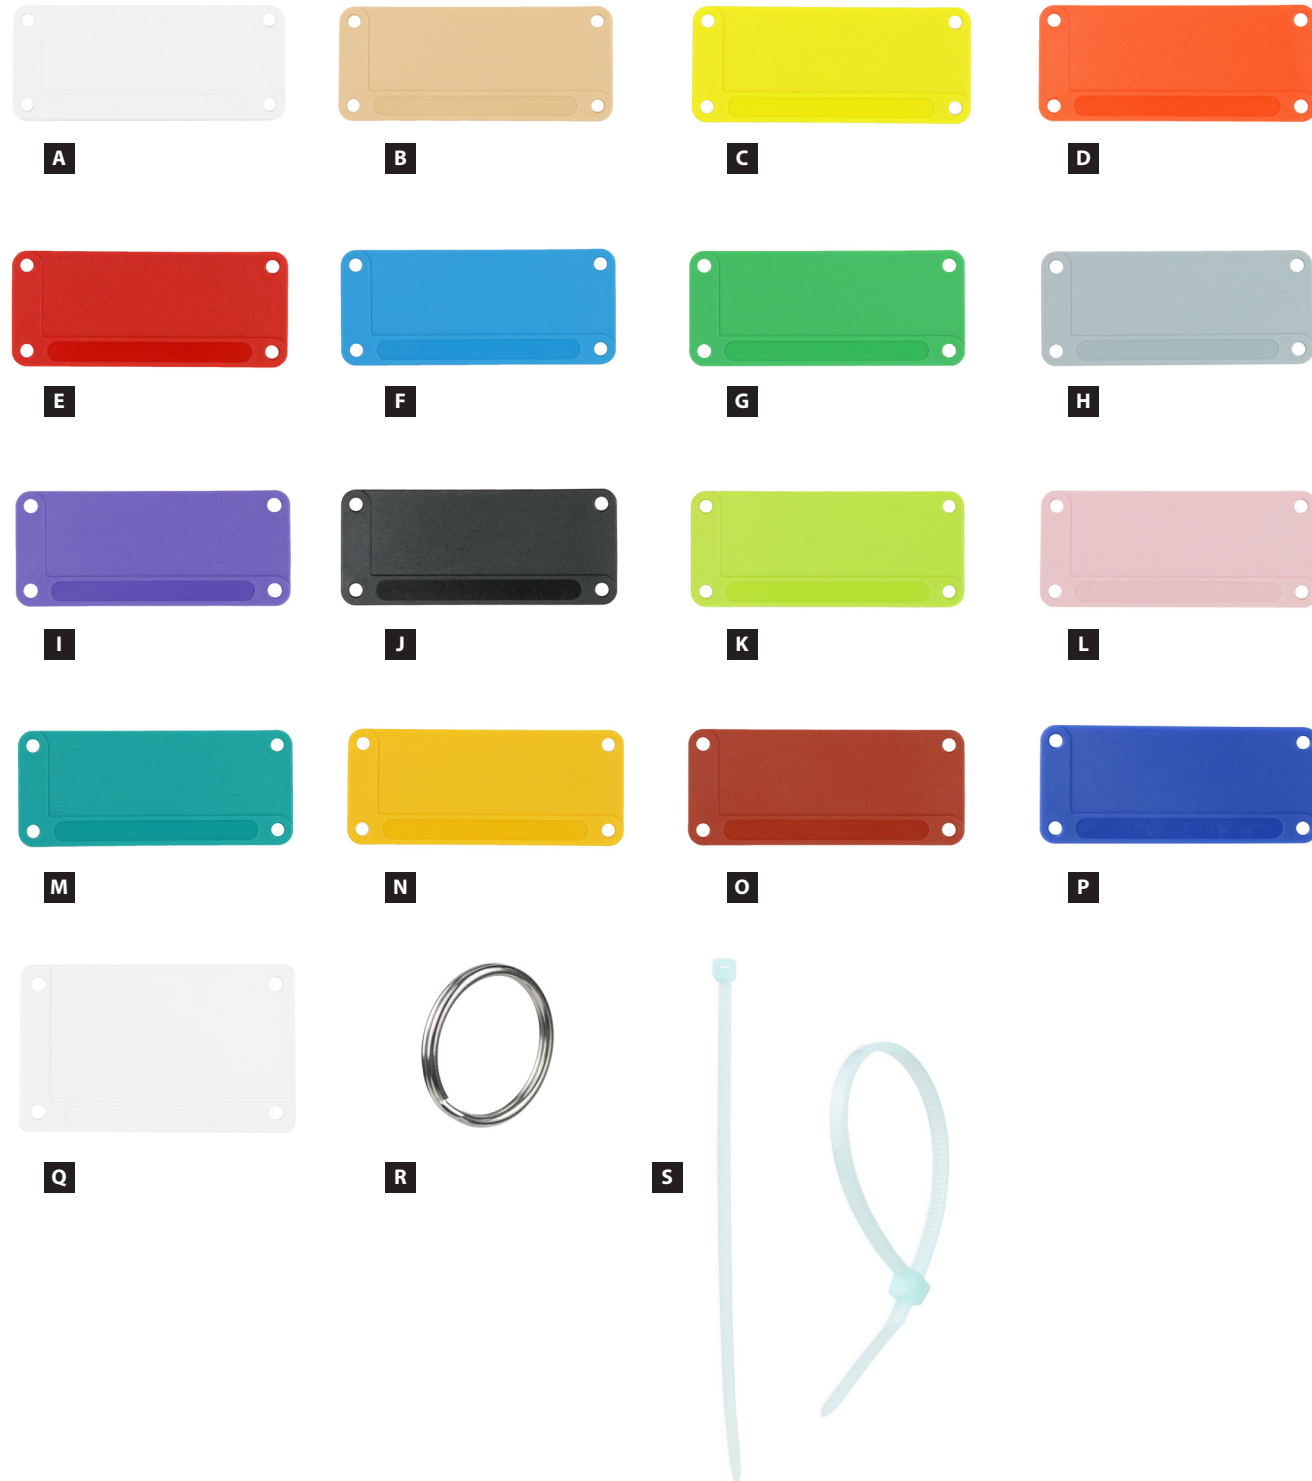

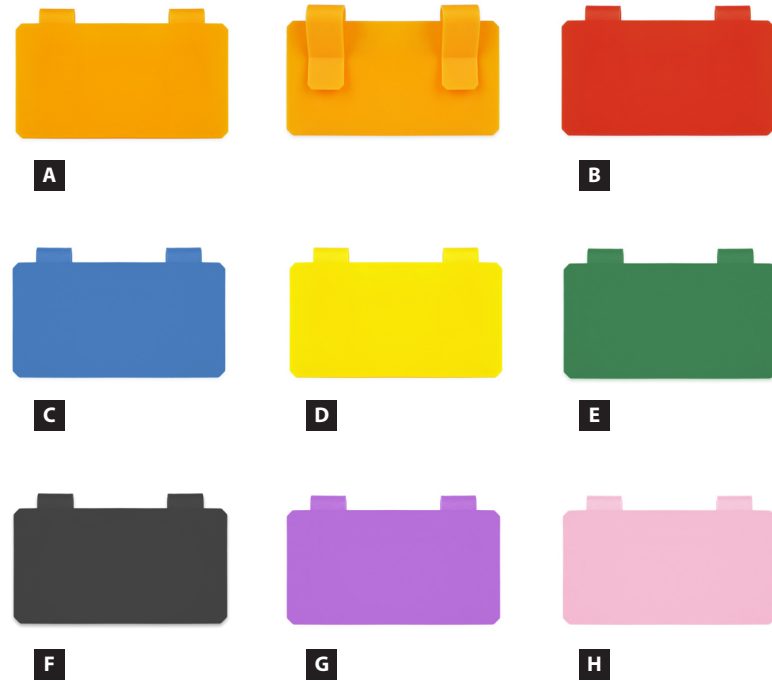

| | Item Number | | Color | Width | Length | Qty |
|---|---|---|---|---|---|---|
| A | TG011 | Tray Identification Tag | White | 3.50" | 1.50" | 100 |

## Hanging Tag

Affix to containers with tamper-evident seals

Designed to be used with container systems, Hanging Tags provide an ideal surface for barcode labels. Simply slide the tamper evident seal through cross-slot and affix to the container. Hanging Tags are single-use, non-adhesive and heat resistant up to a temperature of 275° F.

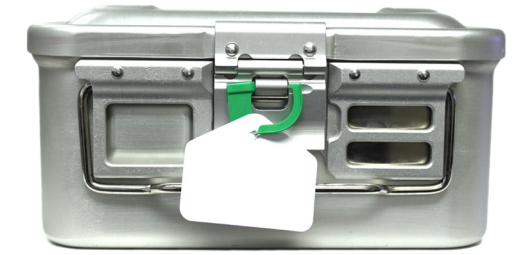

A

## Loaner & Vendor Tray Labels

Document information & attach to trays

Both the Loaner & Vendor Tray Labels consist of the following: 500 tray label tags, 500 autoclavable zip ties, and 1 marker. The tags and zip ties are single use and can be autoclaved in cycles 132°C for 4 minutes or 135°F for 3 minutes.

## Indicator HangTime Labels

### Easy activation indicator shows elapsed time

Indicator HangTime Labels are offered with a 1 Hour, 72 Hour, 7 Day or 12 Day time indicator adhered to a self-looping label, allowing for quick and ongoing observable clarification of how long it's been since an endoscope has been processed. The label allows staff to document the scope serial number and healthcare worker initials, as well as the date and time the indicator was activated. To activate the indicator, firmly press the blister on the strip, and a safe dye migrates along a display run-out window, which shows elapsed time.

**A**

## HangTime Labels

### Document when a scope was last processed

HangTime Labels are designed to assist healthcare workers with tracking the day and month when the scope was last processed. They also include fields for the Scope Serial Number and Initials. They are available in green, yellow, pink, orange, blue and white.

**B**

## Flexible Endoscope Label

### Document scope processing details

Flexible Endoscope Labels are sure to be the solution to managing scope reprocessing and ensuring quality patient care. This self-looping label includes fillable fields for important details and a space to place a patient sticker.

**C**

## Eye Wash Temperature Check Tag

### Document weekly maintenance checks

Eye Wash Temperature Check Tags assist healthcare workers with verifying that the water of their facilities' eye wash station is within a tepid temperature range. Attached to a 36" nickel-plated ball chain to hang from eye wash stations, the front features a log for individuals to document weekly maintenance checks of their facilities eye wash station. The back features a liquid crystal thermometer, along with the recommended water temperature range of 16-38°C (60-100°F).

## Biohazard Label

Clearly label hazardous materials

This self-looping Biohazard Label features the universally recognized biohazard symbol, indicating the presence of potentially infectious materials. It is ideal for use on containers, trays or carts holding contaminated instruments to help clearly communicate to staff that the items require extra caution when handling.

## Quality Audit Tray Label

Track quality defects with instrument trays

Designed to help SPDs track and trend quality defects with instrument trays, the Quality Audit Tray Label allows the end-user of instruments to report an observed tray defect by making a tic mark in the corresponding check box, which is then returned to SPD leadership for tracking and quality improvement purposes. The front portion allows staff to document critical information including the doctor's initials and name, as well as the operating room number and identified problem. The back features a space for healthcare workers to adhere an instrument tracking label.

## Self-Tie Container Tag

Large, blank tag for sterilization containers

Compatible with various tracking and tracing systems, the container tag serves to identify contaminated containers when self-adhesive labels cannot be utilized. Made to withstand automatic washers and steam sterilization, the large container tag is latex free and can be attached onto the handle(s) of multiple sterilization containers.

## Loaner Label

Identify loaner equipment & record details

The self-looping Loaner Label is designed to help the SPD identify loaner equipment, record information about loaner equipment, and track loaner equipment throughout the sterilization process.
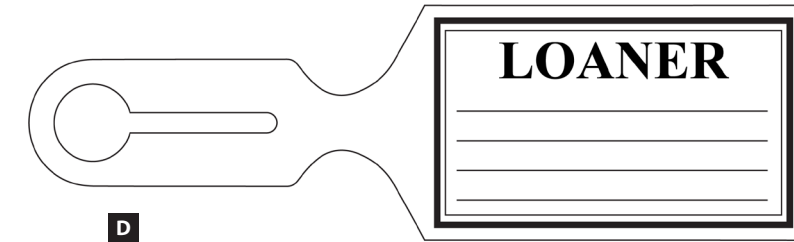

## Preprinted Tray Label

Differentiate between instrument sets

The Preprinted Tray Label is designed for registering sterilized items, enabling recall of all items if necessary. These PP-based labels are resistant to disinfection, washing and sterilization. Includes fillable fields for the CSSD and the OR.
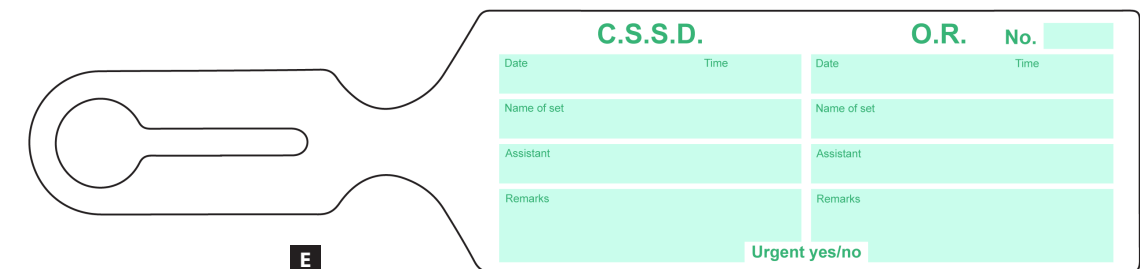

| | Item Number | Description | Color | Length | Width | Qty |
|---|---|---|---|---|---|---|

| E | 403125 | Self-Looping Tray Label - Preprinted | White | 9.50" | 2.00" | 500 |

## Self-Looping Tray Labels

Available blank or custom-printed
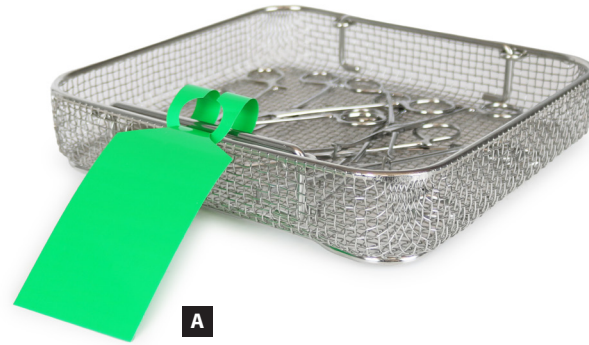

Self-Looping Tray Labels facilitate specific markings and remarks for sterile or contaminated instrument trays. The PP-based label is suitable for sterilization and resistant to washing and disinfection and thus can stay with a tray of instruments all the way through the decontamination process. Create your own Self-Looping Tray Label with the color and message of your choice!

## Custom Vinyl Labels

Durable, custom-printed, two-color labels

Custom Vinyl Labels are available as magentic or adhesive. Both options are made from durable, industrial-grade vinyl that will endure even harsh environments. Custom Vinyl Labels can withstand temperatures ranging from -40°F to 200°F and are UV, water, chemical and smear resistant. Material and text color options are: Red, Orange, Yellow, Green, Blue, Black and White.

## Washer Rack Labels

Like a license plate for your washer rack

Washer Rack Labels are used to identify and track washer racks through the washing cycles. Like a license plate for your washer rack, each label has a unique human and machine readable alphanumeric number. Made with anodized aluminum and robust adhesive backing, they are designed to withstand repeated washing cycles.

## Clean Label

### Removable label

The clean label is intended to conceal and cover the biohazard symbol on SST tray systems when transporting clean medical instruments. The label is a 4 x 4 Inch design with a removable adhesive backing that has a green colored background and "CLEAN" in white text. Prior to use, ensure the application surface area is dry and simply apply the label with firm thumb pressure.

**A**

## Multi-Purpose Equipment Label

### Identify contents as Clean, In Use or Dirty

The Multi-Purpose Equipment Label was developed as a way to ensure consistency and identify whether medical equipment designated for patient use is either clean, in-use or dirty. It has a pull-tab style design with an adhesive backing that doesn't leave residue behind and can be applied to numerous medical devices, allowing individuals to correctly confirm the status of equipment.

**B**

## High Level Disinfected Label

### Identify contents as Clean/HLD or Biohazard

Designed for containers that hold high-level disinfected or contaminated scopes, this label has a green top tab that reads "CLEAN AND HIGH LEVEL DISINFECTED", as well as a removable self-adhesive orange bottom tab that reads "BIOHAZARD" in black text and provides space to record the time the scope was pre-cleaned.

**C**

## Transportation Label

### Available with or without transport checklist

This label is ideal for transporting materials considered bio-hazard, while acting as an essential communication tool in the process. By labeling a cart or container "biohazard" upon its return to the SPD, the Transportation Identification Tag assists in supplying information to the OR/Procedure Room. It has a check list for the surgical/procedure room/sterile processing team to ensure adequate delivery of the case cart or container in question. Also available without the checklist.

**D**

## Quick Turnover Label

### Identify the status of contents

This label has two perforated tabs; a green tab with "TRANSPORTATION TAG" and a red bottom with "QUICK TURNOVER" along with a space to indicate items and time needed, as well as a green tab with "CLEAN" in black text and a fluorescent orange bottom featuring a biohazard symbol with "DIRTY" and "BIOHAZARD" in black text.

## Insta Grid Panels

Magnetic & adhesive customizable grids

Insta Grids are ready to use in seconds. They are available for use on a magnetic board or peel & stick version for use on any whiteboard. Just stick on the board creating an instant grid. Insta Grids can be customized to any application including creating larger rectangles by cutting grid cells to size. Connect grids together to add columns and rows as needed.

## Magna Tags

Write custom messages on magnetic tags

Quickly label any magnetic surface with the Magna Tags. Attach your own label on the surface of the tag or write directly on the erasable surface with a magic marker. Magna Tags are offered in 6 different colors.

## Handheld Label Gun

### For labeling packs, trays and pouches

Our Handheld Labeling System has been designed specifically with Central Sterile in mind for the labeling of any items that you need to be autoclaved - from sterile linen packs to instrument trays, and peel pouches. It also has great versatility for labeling in other hospital departments such as dietary and pharmacy. This system gives you the flexibility to print two lines of information with up to eight characters per line. The available characters include two Gregorian dates for printing expiration and autoclave dating with additional bands for load and sterilizer numbers.
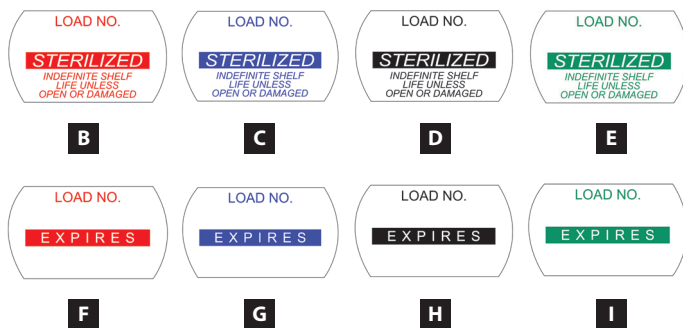

## Premium Handheld Label Gun

### High-quality label system, two-part labels

A labeling system with two-part labels and a premium label gun. The label gun offers fast and simple drop-in loading, an accurate and precise label feed, clean and easy insertion and removal of the ink-roller, and a one-piece robust and resistant plastic housing for full coverage and protection of the label roll inside. The two-part labels were designed to allow the sterilization record label to go with the patient record after use. This will help facilities know exactly when an item was sterilized with each patient. These labels are available in both "Event related" labels and "Expiration" labels options with in 4 standard colors. All labels are steam and EtO compatible.
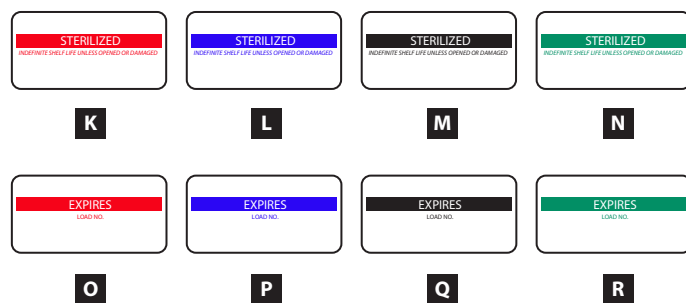

| | Item Number | Description | Color | Compatibility | Qty |
|---|---|---|---|---|---|

## Clean/Dirty Reversible Signs

### Magnetic holder with reversible sign

These signs are a reversible design, one side colored red with a white biohazard symbol, the other side green with "CLEAN" in white lettering. Included with each sign is a reusable vinyl magnetic holder that can be easily repositioned and affixed to various racks, carts, trolleys where applicable. The magnetic holder and reversible signs can be purchased separately as replacements.

A

## Stainless Steel Time Out Sign

### Compact, stainless steel Time Out reminder

A "Surgical Pause" is the universal protocol for preventing wrong site, wrong procedure, and wrong person surgery. This sign serves as a perfect reminder. The 1" x 5" dimensions make this sign visible to read, yet still compact and light. The sign can be sterilized individually or be included inside with a set of instruments. The 304 grade stainless is materially compatible with steam, EtO & gas-plasma sterilization.
